PRODUCT CATALOGUE

Caola Cosmetics and Household Chemicals Ltd. is an almost 200-year-old cosmetics company, still owned by Hungarians, with its own production plant and research base. Caola's focus is on social responsibility, building national value and creating jobs. The company manufactures and sells biocidal products, cosmetics, household chemicals and over-the-counter insecticides in different presentations to meet the needs of all segments.

The product range includes disinfectants, gels, creams, surface disinfectants, cleaning products, shaving products, body, hand and hair care, baby care products, talcum powder, various household chemical products and insecticides. Caola has the plant and technological facilities to manufacture and package the products. Its activities also include contract work for various companies and the production of own-brand products.

In 2021, the time has come for Caola Zrt. to renew all aspects of the 190-year-old brand in order to increase production and capacity as efficiently as possible. The most prominent stage in this renewal is the construction of a new, fully equipped factory complex in Martonvásár in 2023. Alongside the greenfield investment in renewable energy, the production machinery for packaging has been designed in line with Industry 4.0.

We are proud of the fact that, thanks to modern developments, our production equipment is capable of automated recipe tracking and our dispensing lines are capable of automated software-controlled workflows.

Caola produces disinfectants and cosmetic products. Based on the production technology, 3 product groups can be defined.

- **Liquids** - mostly containing alcohol,
- **Gels, creams** - no alcohol, higher viscosity.
- **Powders** - e.g. talcum powder

Industry 4.0

Sustainability

The new production facility has an advanced filling line capable of manufacturing aerosol products, wet wipes and various packaging solutions. A solar power plant has been installed to reduce energy consumption, while a heat pump system minimises gas consumption. The production equipment includes a colloid mill and several mixing groups that provide controllable heating, cooling and vacuum. Safety measures such as explosion-proof design and nitrogen inerting system guarantee the handling of flammable and explosive materials. The plant also employs an advanced wastewater treatment system and automated alcohol measurement, ensuring efficient and safe production.

Sustainability was a key consideration in the design of the plant. A modern solar farm has been installed for energy efficiency, which contributes to reducing the cost of ownership. In addition, the plant has its own water treatment plant, which treats the waste water generated and discharges it in compliance with environmental standards.

Caola Ltd.'s plant therefore stands out not only for its modern technology and efficient production processes, but also for its environmentally friendly operation, which contributes to sustainable industrial production.

Our portfolio includes many well-known and trusted brands.

- **Barbon** and **Figaro** shaving ranges,
- **Ovenall** tooth and oral care products,
- **Velmetina** hair care products
- **Caonatur Baby** baby care line based on natural ingredients.
